CHALLENGE CONTEXT

What the official India Runs event asks you to build

Track 1 — contextual relevance scoring, signal integration, and a successful shortlisting pipeline.

100,000

Candidate profiles in the official challenge pool, each carrying 23 redrob behavioral signals, ranked against a real Redrob AI Engineer JD.

Top 100

Required output: a ranked shortlist in the predefined submission CSV format, with a 1–2 sentence rationale per candidate explaining the ranking.

- Submission must include a **public GitHub repo**, a working **sandbox link**, and a **ranked output file**.
- Evaluation runs through 5 stages — format check, ranking quality, signal integrity, trap detection, and architecture review.

MY SOLUTION

Deterministic, CPU-only candidate rar

Rule-based scoring across 6 signal groups — fully transparent, rep explainable at any reviewer stage.

- Skills match via token overlap with the JD
- Years of experience extraction and scoring
- Seniority-level alignment with the target role
- Bangalore location bonus (JD preference)
- Notice-period penalty for long lead times
- All 23 redrob behavioral signals weighted

Step 1 Load candidates.jsonl (100,000 records — local only, not committed)

Step 2 Extract 6 signal groups per candidate

Step 3 Apply JD-priority weights → composite final_score (0.0 - 1.0)

Step 4 Sort descending, take top 100

Step 5 Write submission.csv with rank, score, 1-2 sentence reasoning

Constraints satisfied: CPU-only · no network during ranking · ≤ 5 min · ≤ 16 GB RAM

3 / 5

OFFICIAL EVENT TIMELINE

India Runs — Key dates from the official

Open hackathon for builders, thinkers, and first-timers across India
grand finale, ₹50 lakh+ in prizes.

19 May 2026

Registrations open and
Track 1 submissions begin.

29 May 2026

Official introductory and
orientation session for
participants.

2 July 2026

Track 1 (Data & AI) and
Track 2 submissions close.

22 July 2026

Virtual Grand Finale —
results and prize
announcements.

FINAL DELIVERABLES

Portfolio-ready assets for any reviewer follow-up

Everything a technical reviewer, recruiter, or judge needs is public & ready to go. No missing files, no missing links.

Public assets

- GitHub repo with clean README and run instructions
- This PDF deck committed to docs/
methodology_deck.pdf from final output
methodology_deck.pdf with reviewer access

Export this as PDF

- Open in **Chrome or Edge**
- Press **Ctrl + P** (or ⌘P on Mac)
- Choose **Save as PDF**
- Set paper to **A4 Landscape**, no margins
- Save as methodology_deck.pdf
